

## ARCHITECTURAL TECHNICIAN

### THE ARCHITECT BUILDERS COLLABORATIVE

fighting climate change with great green design

**The Architect Builders Collaborative Inc.** believes in **fighting climate change with great green design.** We work with Clients and Builders throughout the G.T.A. from Cobourg to Elora to create and renovate elegant green buildings that nurture the human spirit.

We have an opening for an **Architectural Technician** to join our growing, energetic group of five full and part-time staff led by Daniel Hall, O.A.A. and Professor Fred Thompson. We enjoy a collective studio environment where everyone contributes to the success of the projects and the practice. We are supportive of family life, and creative pursuits and offer an accessible and supportive work environment that welcomes diversity.

You will have at least 2 years of formal education in the field and 3 years of work experience, ideally working on construction documentation for Part 9 buildings. You have a demonstrated passion for green design, are comfortable working independently when required, but have strong interpersonal communication and collaboration skills. You will have the opportunity to develop your skills and grow with us through a variety of projects including single family residences, rental housing, renovations, and small to medium commercial and office projects. Your work will cover all aspects of project delivery in an Architectural office including developing details and drawings for Zoning approvals, Building Permits, and Construction Documents.

To be successful in this position, you will be skilled in using BIM software, MS Office and Excel, and familiar with Adobe Photoshop, Illustrator and InDesign. The ideal candidate will also be able to take on the role of BIM Coordinator for the practice, responsible for maintaining and upgrading our Archicad Teamwork BIM environment.

We offer competitive compensation based on experience with fully paid overtime, although we seldom require that. Flex-time and part-time work schedules are possible where circumstances merit.

Please no phone calls. Only applications submitted through our website will be considered.

## THE ARCHITECT BUILDERS COLLABORATIVE

fighting climate change with great green design

### Qualifications

- A minimum of 2 years formal technical education in Architectural Technology, Building Science, or similar training.
- 3 years of work experience, ideally working with construction documentation of Part 9 buildings.
- Excellent written and verbal communication skills
- A demonstrated commitment to green design
- Experience with 3-D BIM software (Archicad or Revit)
- Familiarity with Adobe Photoshop, Illustrator, and InDesign.
- Good organizational skills including the ability to prioritize work and complete multiple assignments in a timely fashion
- A commitment to your personal and professional growth through work

### Responsibilities

You will work closely with a Lead Designer and the Director of Design to prepare documents for client review, permit submissions, tenders, and construction.

The work includes:

- Documenting existing conditions
- Creating BIM models in Archicad
- Preparing permit and construction drawings in Archicad
- Preparing study and presentation renderings

### We welcome Diversity

At The Architect Builders Collaborative, we believe that diversity supports great design. We welcome people of all backgrounds, gender, and abilities who want to help find solutions to climate change through making great green buildings.
