# Control and Automation for the Commercial Integrator

Total Control 2.0™

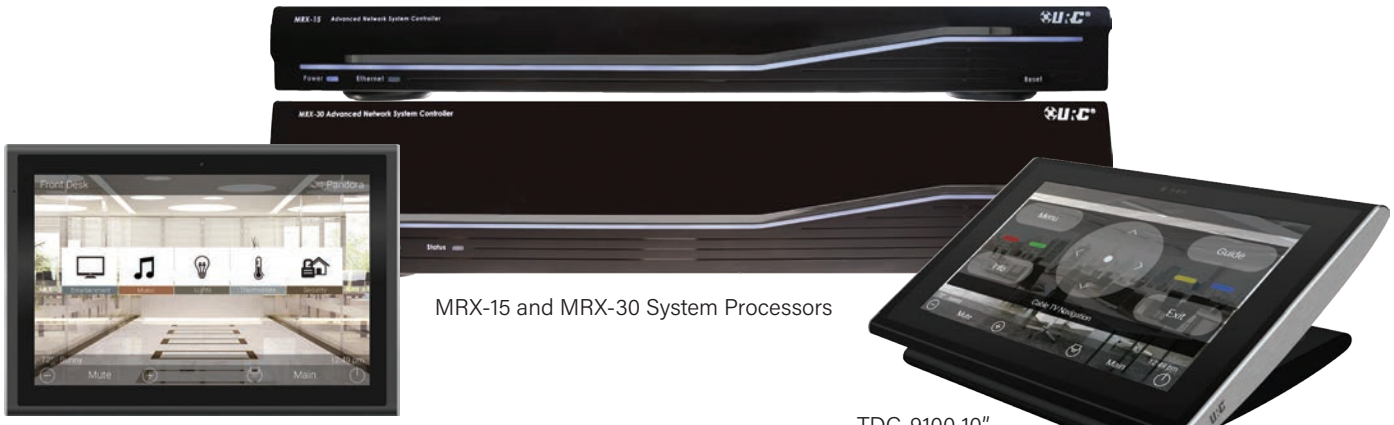
# Premium, Profitable Control

URC offers premium automation and control for your commercial installations.

Attractive and intuitive user interfaces, custom onscreen graphics and robust automation make URC products ideal for restaurants, bars, huddle rooms, conference rooms and hospitality spaces.

Powerful processors, engineered for commercial and high-end residential applications, provide rock-solid performance for your most challenging projects.

Two programming options allow you to choose: TC Flex 2.0 for full customization designed by programmers or Accelerator 2.0 for fast, efficient customized programming.



MRX-15 and MRX-30 System Processors

TKP-9600 10" In-Wall Touchscreen

TDC-9100 10"
Tabletop Controller

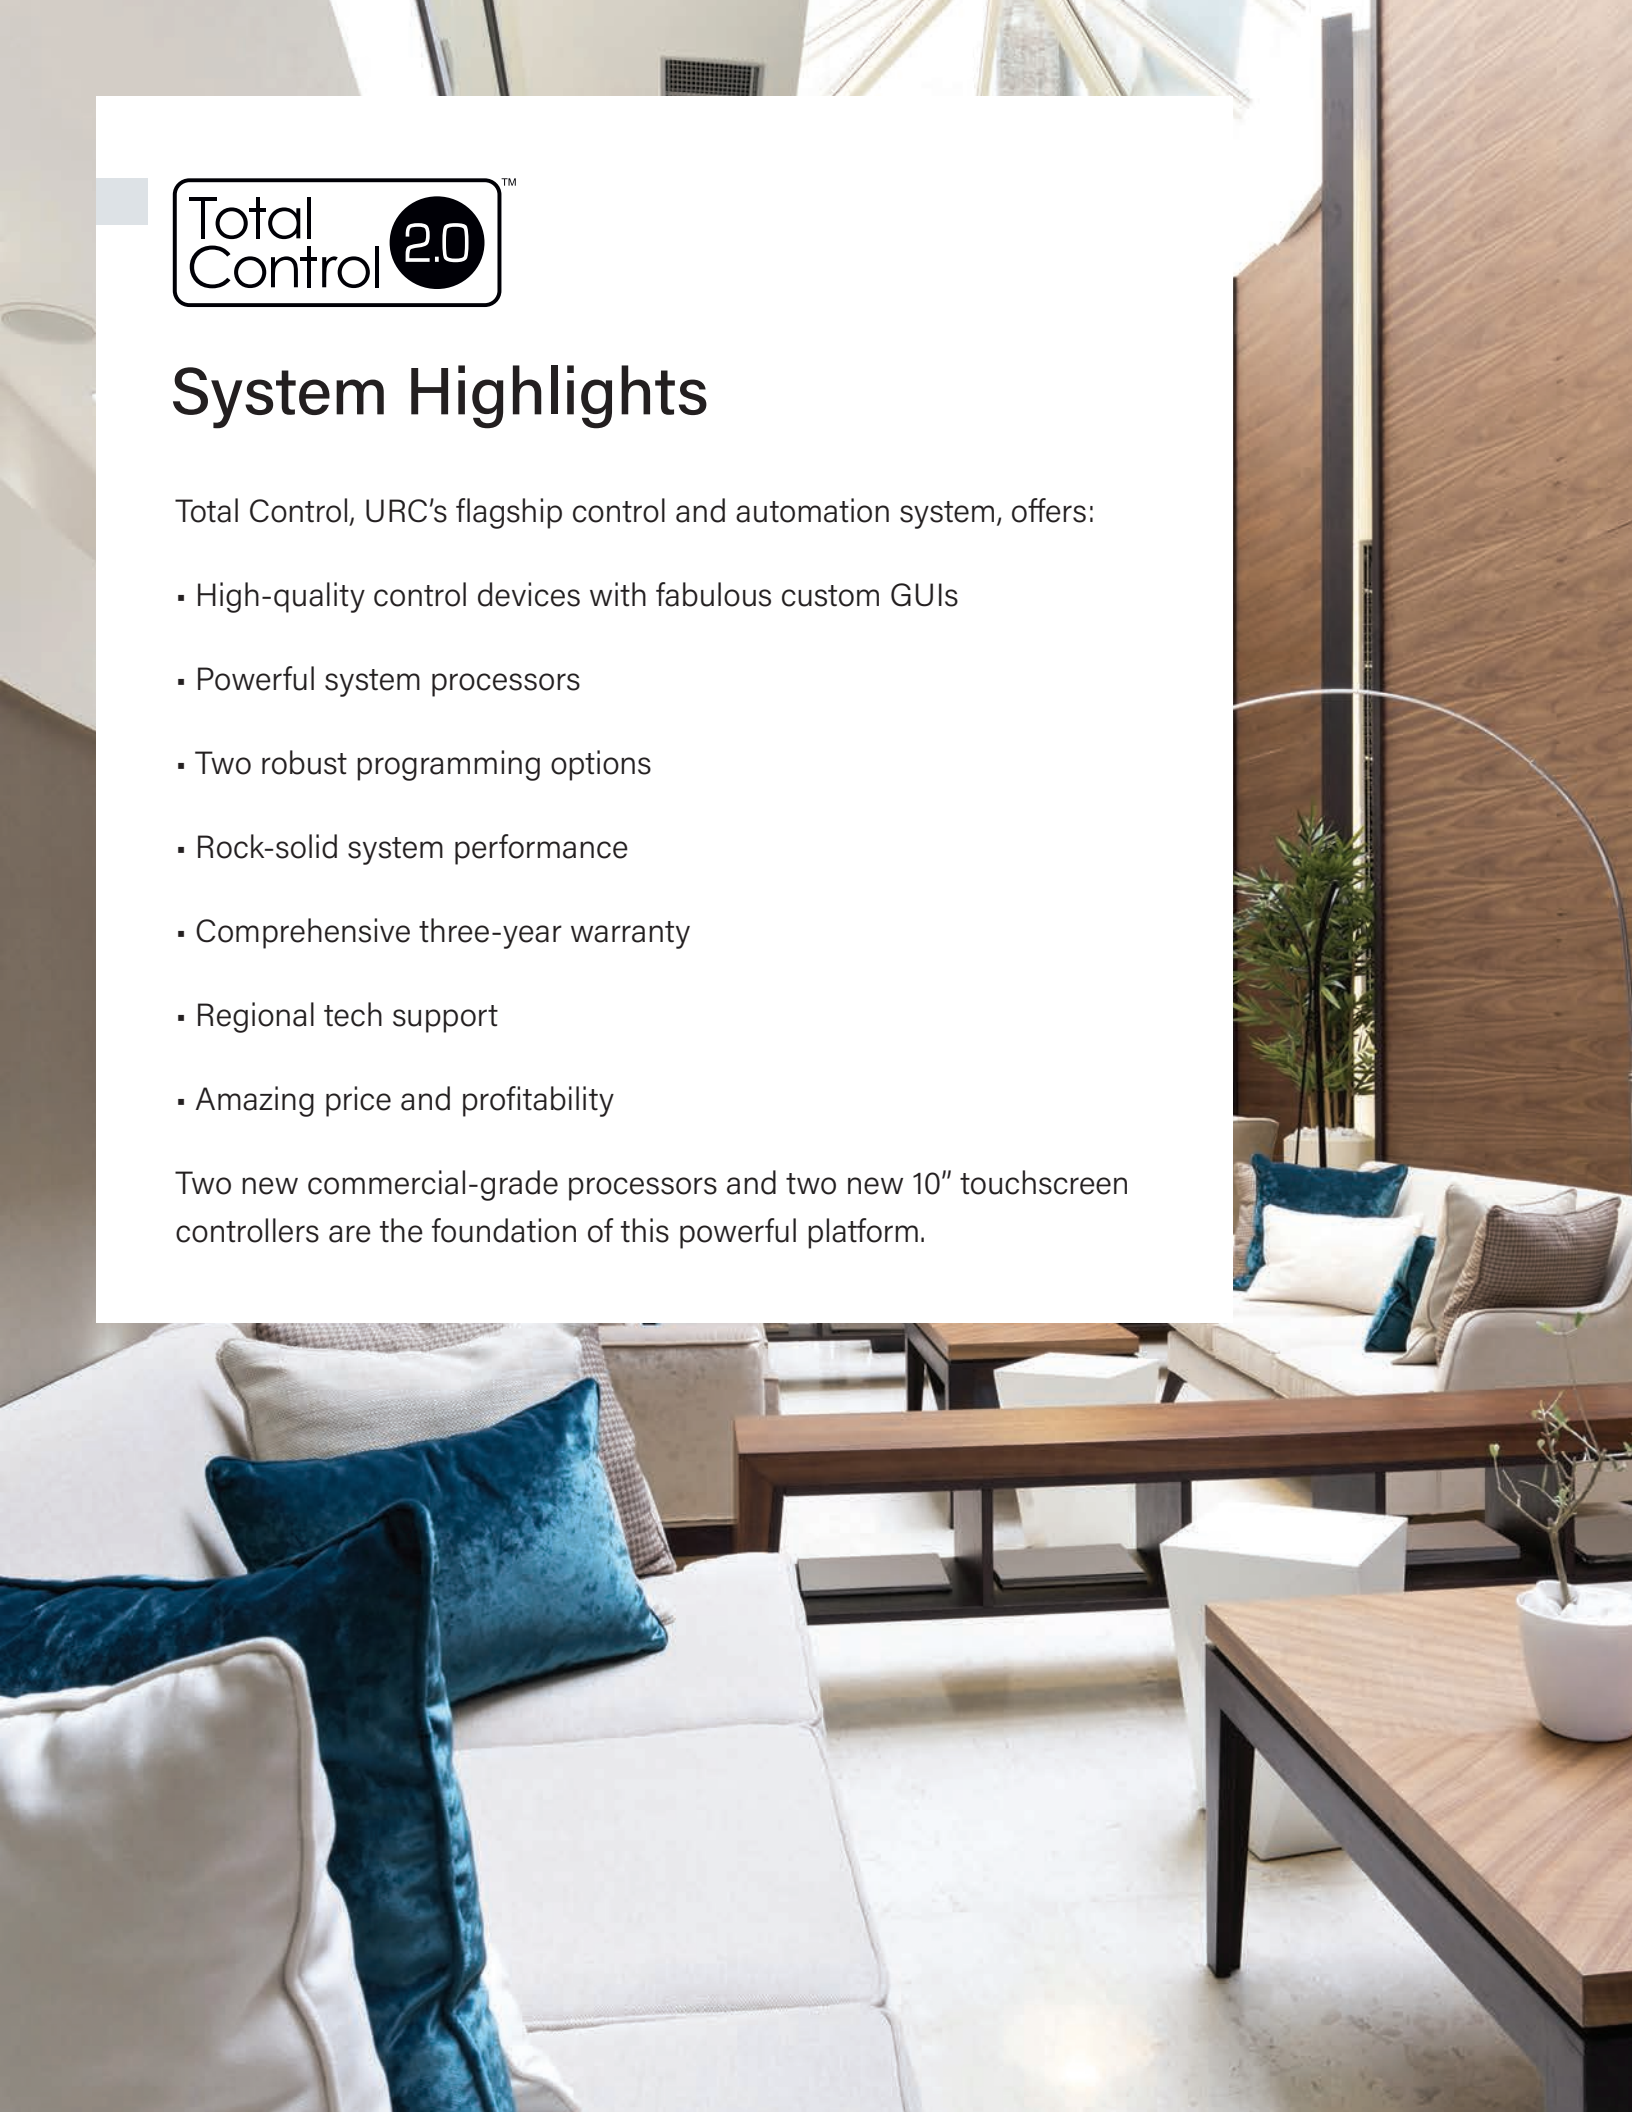
Total Control 2.0™

# System Highlights

Total Control, URC's flagship control and automation system, offers:

- High-quality control devices with fabulous custom GUIs
- Powerful system processors
- Two robust programming options
- Rock-solid system performance
- Comprehensive three-year warranty
- Regional tech support
- Amazing price and profitability

Two new commercial-grade processors and two new 10" touchscreen controllers are the foundation of this powerful platform.



# Commercial Applications

Only available directly through URC, Total Control is the perfect system for commercial integrators. Scalable, flexible and completely customizable, this powerful product line is certain to amaze you and impress all of your customers.

## Restaurants

Deliver robust entertainment and lighting control – including audio and video distribution. Custom onscreen graphics enable you to put your customers' logos and photos right onto the user interfaces.

## Bars

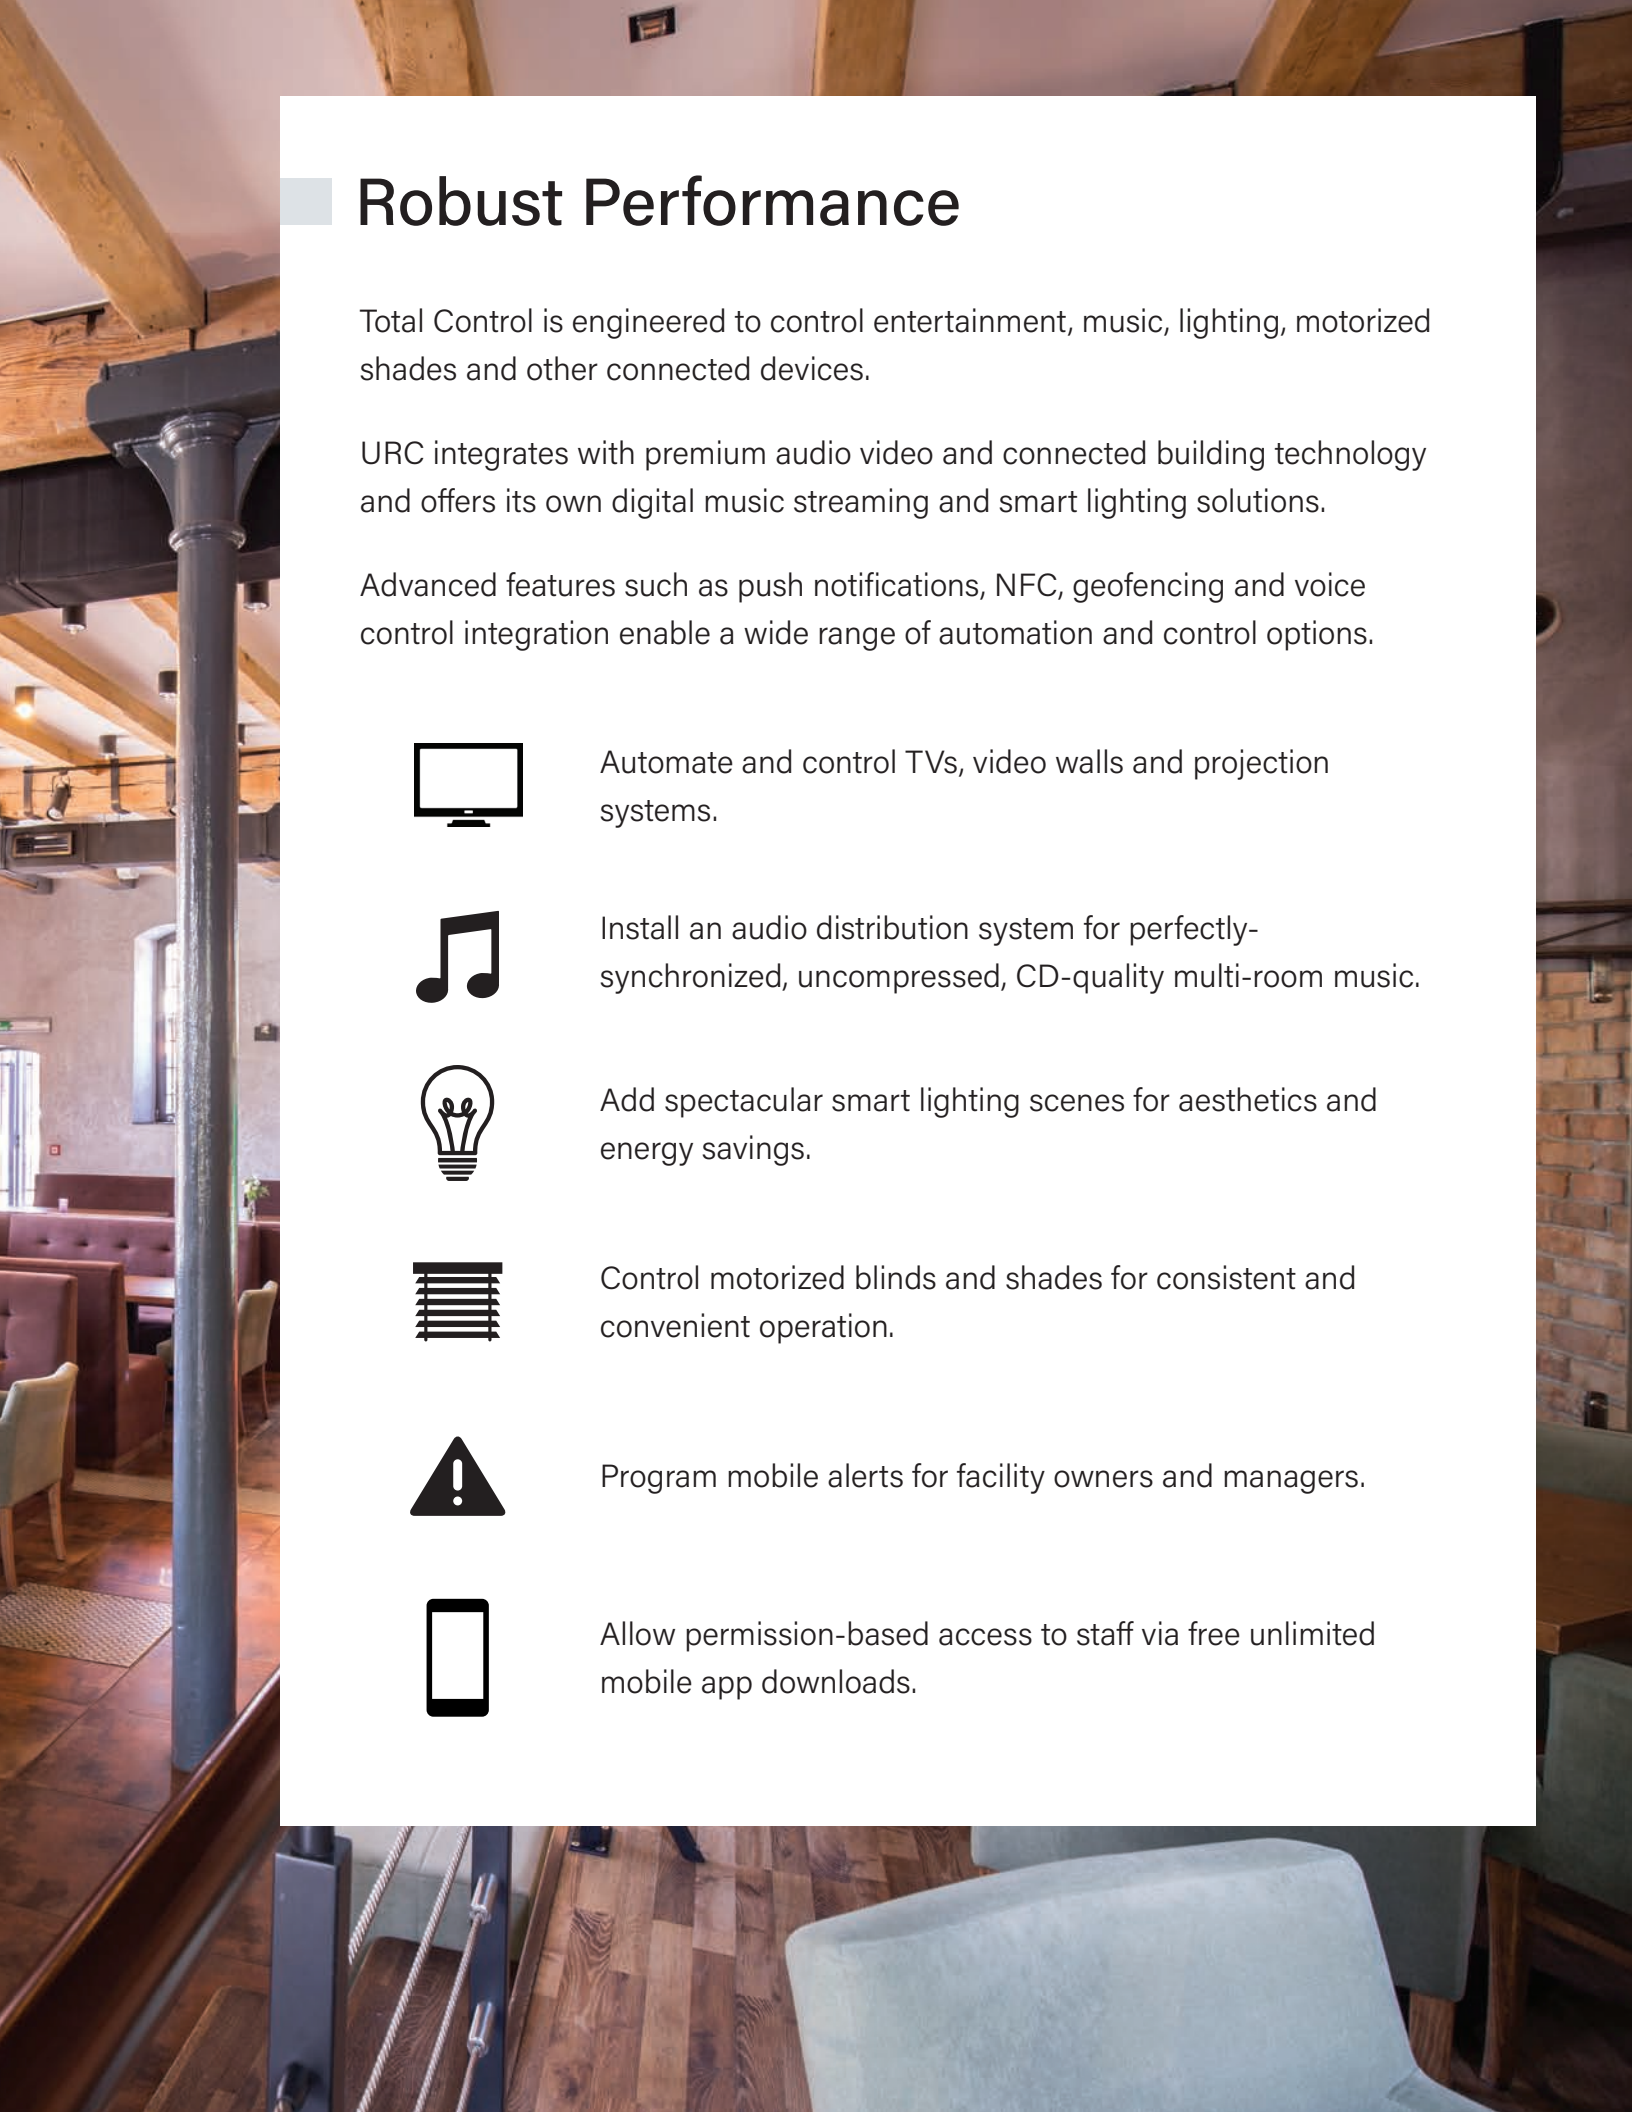
Make it easy for managers and staff to focus on customers, rather than worrying about facility operation. Automate TV and music systems. Control lighting and shades based on day and time. Program one-touch control of common activities.

## Hospitality

Total Control offers premium and intuitive control of TVs, distributed music, lighting and shades. Install Total Control in spas, fitness centers and MDU common areas.

## Office

Control presentation devices in huddle spaces, conference rooms and executive offices. Program smart lighting and shades to automatically adjust based on sunrise, sunset and sensor activity. The intuitive user interface allows for easy control and operation of devices.



# Robust Performance

Total Control is engineered to control entertainment, music, lighting, motorized shades and other connected devices.

URC integrates with premium audio video and connected building technology and offers its own digital music streaming and smart lighting solutions.

Advanced features such as push notifications, NFC, geofencing and voice control integration enable a wide range of automation and control options.

Automate and control TVs, video walls and projection systems.

Install an audio distribution system for perfectly-synchronized, uncompressed, CD-quality multi-room music.

Add spectacular smart lighting scenes for aesthetics and energy savings.

Control motorized blinds and shades for consistent and convenient operation.

Program mobile alerts for facility owners and managers.

Allow permission-based access to staff via free unlimited mobile app downloads.

# The System

Total Control offers rock-solid performance and extreme versatility for your commercial and high-end residential installations, including premium user interfaces, powerful processors and high-quality digital music streaming systems.

### Tabletop Touchscreen Controllers

Available in 7″ and 10″ screen sizes with induction charging stands and video intercom function.

### In-Wall Touchscreens

Available in 5″, 7″ and 10″ screen sizes with video intercom function.

### Keypads and Lighting Control

Hard button keypads and Z-Wave® lighting control.

### Mobile Apps

Permission-based system control from iOS and Android smartphones and tablets.

### Processors

Two powerful processors for all size commercial and high-end residential jobs.

### Digital Music Streaming

Amplifiers and streaming players for outstanding, uncompressed, CD-quality distributed audio.

# Programming

URC offers two great options for programming Total Control. Accelerator 2.0 provides quick, template-based design and graphic customization. TC Flex 2.0 delivers totally-customizable, freeform GUI design on a clean canvas – a must for complex customization.

| | Accelerator 2.0 | TC Flex 2.0 |
