

Roll Shutters FOR YOUR CABANA

by **DDK**

Roll shutter on Cabana, as seen from the outside

Roll shutter on Cabana, as seen from the inside

KEEP THE WEATHER OUT

Roll shutters provide a highly effective, yet aesthetic solution to closing your cabana opening, whenever it's not in use. They keep the weather and animals out, as well as keeping your contents out of sight. Constructed with European-made high quality aluminum in a variety of colours, a roll shutter rolls up into a panel box installed above your cabana opening. Your entire opening is thereby available for use; in contrast to folding doors which are stored either at the top or sides of the opening and cut down on available headspace or counterspace.

Roll shutters are the perfect solution for closing your cabana opening.

- Protects interior from weather and animals
- Full size opening is available when roll shutter is up
- European-made quality and workmanship
- Variety of colours available
- Aesthetically pleasing, clean lines
