## WHICH IS YOUR FAVORITE?

**IMPORTANT:** Consult your local professional when choosing your countertop. Natural stones are not as durable as man-made products, it is always best to discuss your choice with your designer and/or local fabricator. If you need help, I suggest visiting Hari Stones, one of the best slab displays in our area.

## ALWAYS THOUGHT THAT GRANITE WAS THE BEST DESIGN CHOICE? - I SAY NO!

This is one of the most expensive items per square foot — make it count, make it perfect.

Explore all your options thoroughly before choosing for your new home or renovation.

Mixing countertops is a very chic way to add personality to your home.

When mixing consider the tones, patterns and proportions - they need to be happy together and compliment one other, but they do not need to be the exact same. Check out my website and view the Campbell House, there is a mix of countertops in this home and the home's colour combinations flow beautifully!

As an interior design professional, I follow fashion, the economy, local and international events to bring you my professional opinion of what is current and innovative in the world of interior design. Join me each month where I hope to inspire you in making your home the very best it can be.
