

BlueOcean NutraSciences Inc. Announces Changes to Management

Toronto, Ontario, November 30, 2017 – BlueOcean NutraSciences Inc. (TSXV:BOC) ("BlueOcean" or the "Company") is pleased to announce the completion of its CEO transition announced in its press release dated October 25, 2017. Effective November 27, 2017, the Board of Directors (the "**Board**") has accepted Dr. Marvin Heuer's resignation and appointed Mr. John Archibald as President and CEO of the Company. Mr. Heuer will remain on the Board acting as a Science Advisor.

The Company also announces that Mr. Stephen Gledhill has tendered his resignation as Chief Financial Officer of BOC, effective November 30, 2017. Mr. Sam Kaner (a member of the Company's Audit Committee) has assumed the Chief Financial Officer position on an interim basis until a permanent appointment may be made. Mr. Gledhill has agreed to assist BOC with an orderly transition and RG Management Services Inc. ("RGMS"), the Company's administrative manager, will continue to provide Corporate Secretarial and other agreed-upon services until BOC has secured alternate arrangements. Mr. Gledhill is a principal of RGMS.

About BlueOcean

BlueOcean NutraSciences Inc. is a Canadian publicly-listed company (TSXV:BOC) whose mission is to develop sustainable products and services from Natural Sources, to improve the lives of its customers. Going forward, the Company's sole focus is commercializing its patent-protected CO₂ gas infusion technology license and US PTO CO₂ foliar spray, patent pending, for accelerating both indoor and outdoor plant growth.

Dissolved natural CO₂ gas in water without bubbles is a new CO₂ delivery method for growers to increase yield via targeted CO₂ irrigation on plant leaves where all CO₂ gas is absorbed. The greenhouse industry has been gassing CO₂ to increase plant yields by an average of 33% (B.A. Kimball, *Agronomy Journal*, V75, September-October 1983) for the past 60 years while foliar spray has been used for the past 50 years. To date, no one has combined CO₂ gassing and water.

Targeting dissolved CO₂ water onto plant leaves versus CO₂ gassing an entire greenhouse to attain a desired CO₂ PPM level could also save 50% of CO₂ gassing costs and improve worker safety. Addressable markets using dissolved CO₂ irrigation water are as follows: 1. \$8 Trillion/y global food market of which \$340 Billion/y is from greenhouse produce and 2. Up to \$50 Billion/y by 2022 for legal global cannabis. No other patent has been issued for applying CO₂ to plants via foliar spray irrigation by the US PTO.

BlueOcean's shrimp-oil business and tax losses are being marketed for sale to focus on its CO₂ irrigation business, which has no competition. Shrimp-oil products are made from sustainably managed North Atlantic cold-water shrimp shells (the by-product of the cooked and peeled shrimp process) which contains phospholipid bound Omega-3 fatty acids and over 40 times more natural astaxanthin compared to krill oil ingredients.

Shrimp oil's unique nutritional properties allow for numerous health claims across a wide range of markets, including the \$4 Billion Omega-3 heart health market, the \$9 Billion joint health market and the \$10 Billion sports supplement market. BlueOcean currently markets its shrimp oil under three consumer brands: Pure Polar® Omega-3 Shrimp Oil, Joint AX™ and Sport AX™. Products may be purchased online at purepolarlabs.com.

Forward-Looking Statements

This news release may contain forward-looking statements that are based on BlueOcean's expectations, estimates and projections regarding its business and the economic environment in which it operates. These statements are not guarantees of future performance and involve risks and uncertainties that are difficult to control or predict. Therefore, actual outcomes and results may differ materially from those expressed in these forward-looking statements and readers should not place undue reliance on such statements. Statements speak only as of the date on which they are made, and the Company undertakes no obligation to update them publicly to reflect new information or the occurrence of future events or circumstances, unless otherwise required to do so by law.
