

Frequently Asked Questions

Potential Growers

Setting-Up a Trial

We will share a typical setup drawing once we understand your irrigation and building configuration.

Trial Costs

We supply the CO2 Infuser and the regulator. We will install, operate and monitor the system. The grower supplies the CO2 gas, the tank, the pump, the distribution hosing and nozzles.

Commercial Revenue Sharing

Will be on a per square foot lease basis once a revenue model has been proven. We will charge 20% of the incremental value derived from trial results and cover all capital expenditures, operations and maintenance.

Potential Agri-Industrial Partners

If you can bring a new value-added proposition for our CO2 Foliar Spray to your customers, we will share our profitability with you.
