

CO2 GRO Inc. Signs Agency Marketing Agreement with OrganicGrow Solutions to Potentially Accelerate Revenue Growth

TORONTO, ON June 17, 2019 (Access Wire) Toronto based CO2 GRO Inc. ("**GROW**") (TSX-V: GROW, OTCQB: BLONF, Frankfurt: 4021) is pleased to announce it has entered into an Agency Marketing Agreement ("AMA") with OrganicGrow Solutions Inc. ("OGS") to potentially accelerate the commercialization of GROW's patent pending CO2 Delivery Solutions in North America. The primary focus will be on the legal U.S. and Canadian cannabis and hemp CBD markets.

The Agreement with OGS will allow GROW to leverage the OGS marketing and sales team to initiate and execute CO2 Delivery Solutions trials. GROW will lead all engineering and design support to OGS clients. Gross profits from commercial agreements will be shared between GROW and OGS. The Agreement is dated June 12, 2019 and its term is perpetual. Either party can withdraw from the Agreement with 180 days' notice.

GROW's CEO, John Archibald, commented, "OGS is quickly becoming a reputable and trusted supplier of cultivation technologies to the cannabis and hemp markets. The Agreement enables GROW to accelerate its CO2 Delivery Solutions deployment in indoor, greenhouse and outdoor cannabis and hemp production facilities in Canada and the U.S."

OGS's Founder and CEO, Russell Cole, commented, "We support innovative, sustainable and effective cultivation technologies like GROW's. Our company is proud to be partnering with GROW and is excited to bring their CO2 Delivery Solutions to our customers."

About CO2 GRO Inc.

GROW's mission is to accelerate all indoor and outdoor value plant growth naturally, safely, and economically using its patent pending CO2 Delivery Solutions. GROW's global target retail plant markets are food at \$8 trillion per year (Plunkett Mar 2017), non-food at an estimated \$1.2 trillion per year with retail tobacco at \$760 billion (BA Tobacco 2017), floriculture at \$100 billion by 2022 (MarketResearch.Biz estimate). Legal cannabis at \$52.5 billion per year by 2023 (Statista) and legal US hemp CBD at \$22B per year by 2022 (the Brightfield Group).

GROW's CO2 Delivery Solutions are commercially proven, scalable and easily adopted into existing irrigation systems.

The CO2 Delivery Solutions work by transferring CO2 gas into water and misting the water across the entire plant leaf surface which is a semi permeable membrane. The dissolved concentrated CO2 then penetrates a leaf's surface area naturally like humans dissolve oxygen into their bloodstream.

Misting of water, dissolved nutrients and chemicals on plant leaves has been used for over 60 years by millions of indoor and outdoor growers. To date, outdoor growers have not had any way to enhance plant CO₂ gas uptake for faster growth.

Indoor CO₂ gassing has enhanced plant yields for over 60 years but 60% of the CO₂ gas used is typically lost from ventilation. Current greenhouse CO₂ gassing levels of up to 1500 PPM are not ideal for worker health and safety. GROW's safer infused CO₂ Delivery Solutions can be used by both indoor and outdoor plant growers with minimal dissolved CO₂ gas loss and much greater CO₂ plant contact resulting in higher plant yields than both CO₂ gassing and no gassing plant yields.

About OrganicGrow Solutions Inc.

OrganicGrow Solutions is a Canadian *Enterprise Solutions Company*. Its mandate is to support high value plant growers who are using or transitioning into organic, regenerative, and conservational horticultural and agricultural practices to maximize consumer acceptance and profitability for growers. OGS brings the most cutting edge and innovative crop inputs, technologies and solutions using best practices to support food and medicinal plants being optimally grown.

OGS' primary focus is the global legal cannabis market. Current clients include the largest Canadian Tier 1 cannabis LPs, cultivators in California and other legal U.S. states, as well as in Portugal and Colombia. Please visit www.organicgrowsolutions.com for more information.
