

CO2 GRO Grow Site Solution Systems

We have designed three CO2 Foliar Spray engineered equipment packages for either indoor or outdoor plant growth that are tailored to fit one of three categories.

Single irrigation booms

Full water systems

Overhead and grow table retrofits

All systems are designed for mechanical contractor or greenhouse owner to readily implement with a package of components such as gas and mass flow controllers.

Our proven CO2 Foliar Spray technologies help our clients maximize their plant growth profitably and safely. Learn more about our products by selecting an equipment package category. We look forward to helping you develop the optimal plant growth solution cost-effectively
