SECURITY SYSTEM CONTROL, AUTOMATION AND
VIDEO VIEWING ANYWHERE ON MOBILE DEVICES

Your Business at Your Fingertips

Honeywell

A safer, smarter, more energy-efficient business... anytime, anywhere!

Looking for an easy, economical way to control your security system, lighting, thermostats and locks—even view live video in and around your business—whether you're at the workplace or across the world? Whether you have a new or existing security system, Honeywell and your professional installer can put all of this functionality at your fingertips using the same devices that are already a part of your everyday life—your smartphones, tablets and laptops. It's time to get connected.

Stay Connected Anytime, Anywhere

Honeywell Total Connect™ Remote Services keeps you connected to your business, employees and assets wherever you are on PCs, iOS and Android™ smart devices.

- Control your Z-Wave® enabled lighting, thermostats* and shades—an excellent way to save money and energy
- Keep an eye on employees, cash registers, merchandise, stockrooms, exits, entrances and more on up to six cameras at a time**
- Learn about important events inside and outside your business via email, text messages or video notifications
- Unlock doors for employees remotely
- Arm or disarm your security system
- View up to 100 sites with one login—great for franchise owners and businesses with multiple locations

Honeywell puts the connected business within reach!
Control your security system, manage energy usage
and view live video on everyday smart devices.

On-Premises Control

Using your company's Wi-Fi® network, you can control lights, door locks, thermostats*, shades and ceiling fans on any compatible mobile device while on premises. It's the easiest way to save money, conserve energy and create a more comfortable work environment.

*Temperature available in Fahrenheit or Celsius.

**Honeywell Total Connect cameras required when using Honeywell Total Connect Remote Services. Ask your security professional for details.

Camera Viewing

Keeping an eye on your business has never been easier. Right from your mobile devices, you can see who is walking through the front door and who is leaving, who just went into your office or if there's someone in the stockroom. View live video feeds from indoor or outdoor cameras at work or on the go for anytime peace of mind.

Security Made Simple

Icons and menu-driven prompts make security system operation easy and intuitive, wherever you are.

Connect to the Possibilities

Your finger is always on the pulse of your business. Think you forgot to lock the door to a restricted area? Just reach for your smartphone and check. You can keep an eye on your employees in the front of the store or supervise a delivery on your mobile device when you're away. The possibilities are endless.

You can even create customized scenes to occur based on events, day of the week or time of day from any Internet-connected device. For example, you can have the doors lock and the thermostats set back every night at a certain time or create randomized lighting schedules for an "occupied" look when business is closed for added security. Scenes can even be programmed to correspond with daylight savings or sunrise/sunset times.
