

On-site sanitation

Coronaviruses are spread person to person through close contact, including at work. While we always have an obligation to maintain clean worksites, that obligation is under sharper focus during an outbreak like the current COVID-19 pandemic.

We will focus on:

- access to soap and water (ways to properly clean hands) or alcohol-based hand sanitizer
- sanitizing commonly touched surfaces or areas
- avoiding the sharing of hand tools and power tools. If sharing is necessary, enable sanitization of shared equipment.
- posting signage on hygiene in English and the majority workplace language so everyone can understand how to do their part

All employees to take self assessment prior to work daily:
