# HIGH EFFICIENCY FIRE FIGHTING EQUIPMENT

## MFU 50-150

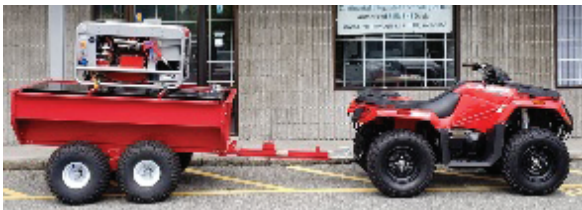

The MFU 50-150 water/foam fire fighting system is a fully self-contained, high pressure Mobile Foam Unit with outstanding versatility and is highly effective in its performance. Single person operation with a turn of a key and a push of a button, the MFU is ready for work in seconds. With its 30-metre hose, 30-metre throw range and remote-control option, the MFU 50-150 can adapt to most fire situations fast, and efficiently. The MFU 50-150 can be mounted on most vehicles or trailers, various water tank sizes are available to suit the user's requirements.

### PREMIUM

With integrated fuel and foam additive tanks. Adjustable turbo jet gun with attachable foam thrower and 25 m hose on automatic reel. Additional C-coupling for external water suction, a 600-litre water tank, skid mounting for standard pick up truck, remote control.

## MFU 40-50 HiCAFS

The MFU 40-50 HiCAFS water or CAFS foam fire fighting system is a fully self-contained Mobile Foam Unit with outstanding versatility and is highly effective in its performance. Single person operation with a turn of a key, the MFU 40-50 HiCAFS is ready for work in seconds. With its 30-metre hose, 18-meter throw range at a 580 psi constant working pressure, the MFU 40-50 HiCAFS can be mounted on light pickup trucks, Quads or ATVs with a trailer, giving the MFU 40-50 HiCAFS a high level of agility to fight fires in difficult to reach areas. Various water tank sizes are available to suit the user's requirements. The unit pictured above is complete with the MFU 40-50, 2 x 45-minute SCBA tanks, the ATV trailer (2000lb GVW) and a 135-litre water storage tank (mounted in the base of the trailer).

# HIGH EFFICIENCY FIRE FIGHTING EQUIPMENT

## VARIO CARBON ULTRALIGHT FIRE EXTINGUISHER SYSTEM

Vario Carbon ultralight fire extinguisher systems are available in 9 and 13 ltr. capacity. With a range of more than 20-metres, firefighters can attack fires with a high level of accuracy from a greater and safer distance. With its comfortable carry handle or optional ergonomic backpack allows for a more efficient control over small and medium sized fires. This compact and hi performance system effectively handles most fire situations with ease.

## CAFS 50

CAFS 50 is a professional grade, compact high-performance mobile fire extinguishing system that has been developed as an alternative to stationery extinguishing apparatus. Generating a CAFS foam capable of reaching an 18-metre throw range with an operation pressure of 320 psi, these 50 litres, weight optimized extinguisher is designed to fight medium class A + B fires. The CAFS 50 is easy to maintain and quick and economical to refill. With large wheels and sturdy construction equipped with a 10-metre hose, the CAFS 50 is easily deployed, even over rough surfaces, making it ideal for work yards, remote camps, or marinas.

## DSPA-5

DSPA-5 is a dry aerosol suppression apparatus which can be deployed quickly and easily by first responders. When deployed, the DSPA-5 generates an aerosol cloud which expands volumetrically, flooding the space and knocking down the flames in seconds saving crucial time and money. Designed for use on class A, B, C and K fires, the DSPA-5 suppresses the fire's flames, thus lowering the temperature and reducing the amount of water required to suppress the fire, by as much as 80%, compared to conventional techniques. This results in less structural damage and increasing fire fighter's safety. The DSPA-5 is non-toxic and harmless to humans or animals, requires less clean up and preserves the scene for fire investigators.
