

Homeowners turn to Element central vacuums for a cleaner, healthier home with added convenience and value.

Element central vacuums feature powerful suction to remove virtually all the vacuumed dirt and dust from your home. This ensures a clean, healthy living environment with improved indoor air quality and reduced allergens.

Today's energy efficient homes are built tighter to lower utility budgets. Exterior wrappings do a good job of insulating the home, but also trap pollutants inside. With a typical vacuum, fine dust particles and bacteria circulate into the home to aggravate allergy and asthma sufferers. When vacuuming with a central vacuum system, you'll never experience the recirculation of dirt and odors. Your home stays clean and fresh while your family stays healthier.

Element disposable bag power units take central vacuum cleaning to the next level by ensuring you never have to touch the dirt, even when the vacuum is full! Element features durable, triple-layer filter bags that do not let any dust escape. Since the outside of the CleanShield[®] bag is never exposed to dirt, neither are you. Simply remove, seal and replace the bag ensuring the cleanest experience possible.

Never touch the dirt, even when the vacuum is full.

- Powerful high-performance motor delivers strong vacuum power
- CleanShield disposable filter bags capture particles as small as .3 microns
- Changing the bag is easy. Simply remove, seal, and replace with new bag - a completely dirtless experience
- Some models feature a CarbonCapture[®] filter to prevent motor dust from staining walls
- Lifetime Limited Warranty

Quick, Convenient Cleaning

Your central vacuum system can be the foundation for a more convenient and cleaner home. You'll never have to carry a vacuum from room-to-room again and cleaning power will always be close at hand.

This unique, versatile system actually brings vacuum power right where messes are most likely to occur.

Simply pull a hose from the Chameleon® valve in the wall and clean your living room carpet before guests arrive. Grab the Vroom® hose from a kitchen cabinet and clean up crumbs on the countertop. With Vroom Retract Vac®, bring the speed and convenience of your central vacuum to your garage, too! Pull the hose from the valve, vacuum any mess and it retracts back in seconds!

Take central vacuum convenience to the next level with these revolutionary time-saving solutions!
