

Modec MDF-500[®]

MDF-500[®] is a decontamination formula that is ideal for cleaning offices, work spaces, and non-insulated ducts for a complete decontamination solution.

Environmentally safe, with high efficacy, MDF-500[®] is a microorganism decontamination formula. Microorganisms include bacteria, viruses, fungi, algae, protozoa, spores and rotifers.

Product Highlights/Benefits

- **SHOWN** to be an effective deodorizer against Microbial Volatile Organic Compounds; odors caused by mold metabolites and against Mycotoxins; chemical by-products that are known to be allergenic.
- **PROVEN** effective as a microorganism inhibitor in EPA Hard Surface Mildew-Fungistatic Tests for a minimum of 21 days.
- **INHIBITS** the growth of microorganisms in exterior applications on porous surfaces.
- **SAFE** to use in virtually any indoor application.
- **MDF-500** can be used to treat HVAC ducts as well as job sites efficiently and cleanly!

MDF-500[®] – The US Government developed the underlying technology, (DF-200), at Sandia National Laboratories and patented the Formulation pursuant to US Patent 6,566,574 B 1. Banner Sales' decontamination formula MDF-500[®] is the EPA registered commercial version of DF-200. MDF-500[®] is registered with the USEPA under FIFRA No. 80346-1/2. In addition, MDF-500[®] is registered throughout the US with applicable state authorities, including the State of California and Canada.

Effective Against but NOT Limited to the Following:

- Aflatoxin
- Anhydrous Ammonia
- Anthrax-AMES RIID Anthrax-ANR 1
- Aspergillus niger
- Bacillus globigii
- Bacillus subtilis
- Bacteriophages
- Bovine coronavirus
- Bovine enterovirus
- Butyl Isocyanate
- Capsaicin (Pepper Spray)
- Enterobacter aerogenes
- Enterococcus faecalis
- Erwinia herbicola
- Escherichia coli (ESBL)
- Escherichia coli O157:H7
- Enterobacter aerogenes
- G Series Nerve Agents
- Influenza A & B
- Klebsiella pneumoniae
- Listeria monocytogenes
- Malathion
- Methamphetamine
- MRSA
- Mustard(HD)
- Mycotoxins
- Nerve Agent
- Norovirus
- Paclitaxel(Taxol)
- Pathogenic Avian Flu(HPAI)
- Penicillium variabile
- Proteus mirabilis
- Pseudomonas aeruginosa
- Salmonella choleraesuis
- Staphylococcus aureus
- Staphylococcus epidermidis
- Trichophyton mentagrophytes(Athletes Foot)
- Vancomycin Resistant
- Enterococcus faecalis (VRE)
