

# Powerful Solutions

For Converged Technologies  
and System Integration

Deal with only one contractor for all of your electrical and technology installations.

Our fully realized Technology Division can deliver consultation, design and installation for the converged technologies of security, IT, and audio-visual. Using Journeyperson expertise together with specialized training, we can supply and service the technology you want and ensure that it has access to power at the same time as part of the same project. This saves you tremendous time, money, and hassle!

Flyer Electric has the unique capacity to provide all your electrical needs, from the incoming power service to your device, and everything in between. Technology partnerships with industry leaders allow us to offer manufacturer-authorized dealership of products with a spectrum that matches your needs.

## Over 35 Years of Powerful Solutions
