## HOME SUPPORT PROGRAM

- Our pharmacists and caregiver make the difference in every prescription they dispense and every service they provide.
- When healthcare providers share information and work closely together, the result is better care for patient.
- Training on how to use medications and specialized devices such as blood glucose meter, nebulizers, Compression stockings, Aero chambers etc.
- Remove any expired or outdated medications to avoid any consequences with current medications.
- Our Home support program provides home visit by well trained staff (LPN or registered care aides) to manage and monitor chronic conditions.
- Daily Home visit includes administration of medications, applications of topical patches, Blood glucose and blood pressure monitoring as per care plan, Administering and/or training with Insulins as per Physician's order.
- Continuing self-management educations with ultimate goal of patient independence.
- Patients who cannot manage their own medications after a sudden change in health, have difficulty taking their medications due to physical or cognitive barriers, have history of medications related hospitalizations or medications administration errors, have multiple chronic conditions or complex medication regimens, need additional teaching e.g. Blood glucose meter, self-injections of insulin, etc.
- There is no additional charge to the patient for once a day visit. There will be \$10 per visit if patient requires more than one visit.

## COMPRESSION STOCKING

- Ideal for Varicose Vein Problem, Tired feet due to swelling.
- Best to measure first thing in the morning. Book an appointment with our Certified fitter in-store or at patient's home.

## Ideal Protein Weight Loss Clinic

- Certified Weight Loss Coaches.

## HEALTH AND WELLNESS

- Our pharmacists are focused on disease management and educations
- Our pharmacy hosts a health and wellness events every month.
- Bone Density Screenings, Cholesterol analysis, Healthy Heart , Smoking Cessation, Spirometry etc.
- Most of our Health and Wellness events are free for our patients.

## FREE DELIVERY

- convenience of having prescriptions delivered right to patient's door.
- we will pick up the prescriptions and drop off you medications.
- Daily, Weekly, Monthly medication delivery.

## INSURANCE BILLING

- Our team works with insurance companies as part of our commitment to ensure patient get best benefit.
- Convenience of billing online with major insurance plans ie. Private and Government.
- Patients don't have to worry about billing or filling up the forms, provided their insurance is set up online.
- We work with insurance company to ensure that medications are covered. Certain medications may require special authority. We work closely with prescriber to help fill up the special authority forms and/or if required, we recommend prescriber to change benefit therapy.

## Accu-Pak (BUBBLE PACKAGING)

- Customized bubble packs as per patient's needs. Weekly, Bi-weekly, Monthly with no additional charge for simple regimens.
- Our Blister packs are clearly marked with times and days.
- Increase medication adherence.
- Well controlled medical conditions. Works great to achieve care plan made by health care team.

## MEDICATION

### REVIEWS

- 20-30 minutes long interview with patient and/or with their care givers
- During medication reviews, our goal is to make patient understand their medications, why and what they are taking.
- Identify and potential problems and interactions
- Create an action plan for medication management and follow-up periodically to ensure plan is being followed.
- Collaborate with other healthcare team to help achieve patient's goal.
- Pharmacist will provide best possible medication history at the end of interview.
