Why our Blinds and Shades?

The bottom-up top-down blinds and shades are only 1 inch in depth and install inside mount to a shallow space of only 1/2 inch. There is no header nor are there pull strings to open the shades; numerous installation options and hundreds of fabrics to choose from.

Check out our 5 star reviews on Houzz, Google, Yelp and Facebook.

...for Shallow Spaces

Nowadays, new construction and remodels leave you with very little depth for an inside mount shades installation. Our innovative design for narrow depth blinds allows for installation using only a 1/2 inch of space without sacrificing quality, looks or function.

From 8 x 8 inches to 70 x 60 inches to 50 x 94 inches and anything between - we've got you covered.

...for Tilt Turn Windows

These narrow blinds and shades are made for European style Tilt Turn windows and doors and install directly to the sash or glass.

The inside mount works perfect with the unique tilt turn operation of the windows and doors. We developed several installation options to accommodate for window materials, site requirements and manufacturer warranties.

...for Sunrooms

Our shades and blinds are the ultimate solution for the different sizes and shapes of sunroom windows and doors. They also work overhead and help you create the perfect indoor outdoor experience between seasons.

Extremely functional in managing temperature, light and privacy, these blinds and shades are minimal in design with no pull strings or cords across the glass.

...for Folding Doors

Our bottom-up top-down blinds and shades install directly to each folding door panel and open with them.

They are so shallow that there is no interference with the hardware or frames. Four small mounting pieces install the shade as an inside mount installation to each panel and keep the shade in place when opening or closing the door.

...for Skylights

The blinds and shades install directly to the opening skylight window and swing open with it.

Optional side tracks or stainless steel wires prevent sagging of the shades and guarantee the functionality.

Plug and play motorized version also available with an integrated lithium-ion battery and 15 channel remote control, App control or Alexa command. No hardwiring needed.

...for Convenience, Large Units and Difficult to reach Places

Sometimes you need motorized shades because of hard to reach places or just out of convenience. For these situations we offer a lithium-ion battery system that is fully integrated in the 1 1/8 Inch top track - battery and motor.

The shades and blinds operate on a 15 channel remote control, via an App or Alexa and can be programmed to different times of the day.

The system is plug and play, does not need any hardwiring and charges via cable like a smart device.

...with Numerous Installation Options for wood, uPVC or aluminum

Almost every window or door requires a detailed look to find the perfect way to install our blinds and shades.

Over the years, we developed many different installation options for our clients - glue strips and glue plates, drill-free clips and brackets, permanent screwed-in installation or a combination of them all.

...E-mails and Reviews

We are happy with the shades that we just got and would like to place another order.

-Lainie and Dave Smith, Portland, OR

German engineering...cannot beat it.

-John Covington, Nashville, TN

I am so ecstatic about my window blinds. Not only are they gorgeous, but they are such a smart design. The installation was a breeze.

-Barbara Masuga, Grand Rapid, MI

The window shades are unique.

They look great, are very functional and fit perfectly in a huge variety of old window frames.

-Scott Karlan, Beverly Hills, CA

We are VERY happy with the blinds from Fenstermann. They all fit and look totally beautiful.

-Carol Munson, Portland, OR

Ingo was super helpful in the selection of blinds and their colors. He responded very quickly and thoroughly to all our inquiries. The product was delivered as promised and was of perfect quality. Installation was as easy as the video tutorials suggested. We are very pleased customers of Fenstermann LLC.

-Martin Buescher, Ontario, Canada

Thanks so much Ingo. We love our new shades.

-Michelle and Dave Martin, Lake City, CO
