

Online Training Course Catalog

ID #	Module	Description
P0382EN	Accessibility for Ontarians with Disabilities (AODA)	This Accessibility for Ontarians with Disabilities Act online training course was designed to help you learn about the Accessibility for Ontarians with Disabilities Act (AODA). This course will help you get informed about the AODA and IASR in one course. This course will provide you with the information you need to ensure that your organization is compliant with Act.
P0383EN	Accessibility Standards Training	The Accessibility Standards Training online training course will provide general requirements in the areas of customer service, information and communication, employment, transportation, and built environment regarding disabilities. and aims to identify, remove, and prevent barriers for people with disabilities. This course was designed to help you learn about Accessibility Standards.
P1254EN	Accident Investigation (CCOHS)	This Accident Investigation online training course is an introduction to accident investigation. It presents a practical approach to investigating workplace accidents by emphasizing how to find the root cause(s), conduct an investigation, and make effective recommendations to prevent similar occurrences from ever

		happening again. Learn how to investigate workplace accidents and incidents to find root causes and prevent similar occurrences.
P1342EN	Asbestos Awareness	This Asbestos Awareness online training course was designed for construction workers. In this course, you will learn about asbestos and its uses, as well as its health hazards and methods of exposure control in the workplace. We also examine the health concerns and how to evaluate exposure to asbestos.
P4636EN	Asbestos in the Workplace (CCOHS)	The versatility of asbestos has led to its widespread use in many locations, including workplaces. While the presence of asbestos in newly-installed products has diminished greatly in Canada in recent decades, many older applications remain in homes, buildings and products. Asbestos materials are a potentially serious workplace hazard, and people who inhale asbestos fibres are at risk of developing critical, often fatal, illnesses. This course equips employers and workers who are not directly involved in asbestos-related industries with the knowledge to recognize, assess and manage asbestos-related risks in the workplace.
P5429EN	Back Safety	This Back Safety online training course is designed for employees in all types of jobs, from a factory worker to an office worker. This course explains the physiology of the back and presents common types and causes of back injuries. It also describes injury prevention, safety practices, basic back exercises, and proper lifting techniques.
P0381EN	Backing Vehicles Safely	In this Backing Vehicles Safely online training course, you will learn safe backing techniques applicable to all types of vehicles, as well as best practices for specific types of vehicles and work situations. This course will explore the basics steps of backing up, summarize when a spotter should be used, and recognize a traffic control plan.

P2807EN	Biological/Organic Hazards - Awareness (CCOHS)	Sources of biological hazards may include bacteria, viruses, insects, plants, birds, animals, and humans. These sources can cause a variety of health effects ranging from skin irritation and allergies to infections (e.g., tuberculosis, AIDS), cancer and so on.
P2879EN	Bullying in the Workplace (CCOHS)	Bullying is defined as a repeated, persistent and continuous behavior, as opposed to a single negative act. Although other types of violence receive more media attention, workplace bullying is of great importance and can affect many people. We all like to think of the workplace as a safe and healthy place to be. However, bullying can be a major concern for some workplaces. This online Bullying in the Workplace training course will address these issues.
P2842EN	Compressed Gases (CCOHS)	This Compressed Gases online training course outlines the hazards associated with the storage and handling of compressed gases, and how you can work with them safely using industry-proven best practices. Gases are compressed to make them easier to use and transport. However, compressed gases have their own unique physical, chemical, and mechanical hazards. These hazards must be understood in order to work safely with compressed gases.
P1285EN	Confined Space Management (CCOHS)	This Confined Space Management online training course helps managers and supervisors to develop an effective confined space program, including permits and procedures for identification and assessment of spaces, control of hazards, safe entry, emergency planning, and training. The course was designed for managers, supervisors, or those who control access to confined spaces and/or direct workers/contractors to enter and work in confined spaces.
P1284EN	Confined Spaces: The Basics	This Confined Spaces online training course covers essential topics such as air testing, ventilation, confined space permits, personal

	(CCOHS)	protective equipment (PPE), and emergency planning. This course should be followed by practical worksite training and drills to familiarize workers with the equipment and procedures which they will use for safe work in confined spaces.
P1286EN	Contractor Health and Safety (CCOHS)	This Contractor Health and Safety online training course will provide a framework to get the contracted work done safely by outlining how to incorporate health and safety aspects into your contracts, from start to finish. This course was designed for contractors, managers, and supervisors, and Joint Health & Safety Committee members involved in contract development, or in developing a contract health and safety program.
P2407EN	Dealing with Difficult or Hostile Customers (CCOHS)	This Dealing with Difficult or Hostile Customers online training course will provide a broad skill set to cope with these situations, and practical communication and coping skills to enhance personnel performance levels. This course is designed to provide front-line staff with an understanding of the stresses and pressures that exists when dealing with customers who can be difficult, volatile, or even hostile.
P0235EN	Developing an Occupational Health and Safety Program (CCOHS)	This Developing an Occupational Health & Safety Program online training course provides valuable practical guidance on the development of an effective occupational health and safety (OH&S) program to prevent accidents and illnesses. In this course, you will learn about the elements of an OH&S program and how to adapt them to conditions in your workplace.
P2880EN	Domestic Violence in the Workplace	In this Domestic Violence in the Workplace online training course, you will learn about the effects of domestic violence in the workplace, and how to recognize signs and symptoms. This course

	(CCOHS)	will also discuss the roles of the employer, supervisor/manager, health and safety committee/representative, and employee in supporting victims.
P2120EN	Due Diligence in Occupational Health and Safety (CCOHS)	In this Due Diligence in Occupational Health and Safety online training course, you will learn about the legal significance of due diligence while also exploring the four main factors that determine the level of action required to achieve it and the best practices to help you develop a safety culture for the safety and the protection of your workplace.
P0367EN	Effective Joint Health and Safety Committees	This Effective Joint Health and Safety Committees online training course will discuss how Joint Health and Safety Committees (JHSCs) are set up, what they do, and how to make them work effectively in your workplace.
P1244EN	Electrical Hazards (CCOHS)	This online Electrical Hazards training course is an introduction to electrical safety in the workplace. The learner is provided with a basic overview of electrical hazards and safety issues commonly encountered in workplaces including construction, manufacturing, utilities, retail, agricultural and office environments. The course describes the basics of electricity and how to recognize electrical hazards and covers different types of preventive devices such as fuses and circuit breakers.
P1319EN	Emergency Preparedness for Workers (CCOHS)	Emergencies can occur at any time and while prevention is the key to avoiding emergencies, it's important that everyone at the workplace be prepared if, and when, they do occur. This online Emergency Preparedness for Workers training course focuses on the role of workers in emergency planning, the assessment of potential emergencies, evacuation and other emergency procedures, training,

		and planning for offsite emergencies.
P1320EN	Emergency Response Planning (CCOHS)	This Emergency Response Planning online training course outlines the key steps to emergency planning and how to respond and make them work effectively in your workplace. These steps include: establishing the planning team, assessing potential emergencies, identifying organizational capabilities, communication, training, testing and improving the plan, and ensuring business continuity.
P1188EN	Fall Prevention and Fall Arrest	This Fall Prevention and Fall Arrest Awareness online training course is designed for Employers and workers in the construction and general industry where work at heights is performed. Fall prevention and fall protection measures can greatly reduce the risk of injury or death. This course describes the various fall prevention methods for working at heights.
P0353EN	Federal Hazard Prevention Program (CCOHS)	This Federal Hazard Prevention Program online training course explains the requirements of the HPP in the Regulations section by section in a practical way. This course explains a step-by-step explanation of the Federal Hazard Prevention Program. Every federally regulated workplace must implement and maintain a hazard prevention program (HPP) according to the Canada Occupational Health and Safety Regulations
P4541EN	Fire Safety Basics	In this Fire Safety Basics online training kids course you will learn the basics of fire safety to keep you and your family safe. In this course, we will talk about the causes of fires, what you can do to prevent fires, how to evacuate (get out!) in case of fire, and first aid for fire-related injuries.
P0234EN	Fire Safety: The	Workplace fire hazards exist and need to be addressed. This course is

	Basics (CCOHS)	designed for everyone who needs to know the basics of fire safety in the workplace. This online Fire Safety training course will cover key topics which include: causes of fires, fire prevention practices, evacuation plans, combatting fires and fire-related injuries.
P3581EN	First Aid Basics	This First Aid Basics online training course has been developed to allow certified first aid attendants to refresh and update their basic first aid knowledge. This program is meant to supplement completed first aid training by providing a review of some of the critical information covered in a typical First Aid Course.
P0272EN	Forklift Safety	This Forklift Safety online training course will deal with how forklift incidents can be prevented, especially when employers and workers work together to improve safety and health at work. Forklifts offer a practical materials handling solution for many businesses, each year they continue to be associated with workplace deaths and injuries.
P0296EN	Hand Safety and Injury Prevention	This Hand Safety and Injury Prevention online training course was designed for workers in retail, construction, and industry. This course will review the different types of utility knives available, their uses, advantages, and disadvantages of each, how to maintain them, and how to work with them safely to avoid injuries to the hands and fingers.
P2119EN	Hazard Identification, Assessment & Control (CCOHS)	Accurately identifying, assessing, and controlling hazards is an essential part of a properly functioning occupational health and safety program. This course will help employers, managers and workers improve their health and safety performance by learning effective and proven methods of hazard identification, assessment, and control. The three modules of the course cover essential topics such as hazard mapping, workplace inspections, risk assessment, and

		the hierarchy of controls. The course was developed by the Canadian Centre for Occupational Health and Safety (CCOHS).
P0286EN	Hazardous Occurrence Investigations for Federally-Regulated Work Places (CCOHS)	The purpose of a hazardous occurrence investigation is to find the root causes, address gaps, and prevent similar events from occurring. This Hazardous Occurrence Investigations for Federally-Regulated Work Places online training course familiarizes workplace parties in the federal jurisdiction with how to carry out their respective responsibilities when conducting an investigation under the Canada Occupational Health and Safety Regulations, Part XV – Hazardous Occurrence Investigation, Recording, and Reporting.
P2055EN	Health & Safety for Senior Executives: Legislation & Liability (CCOHS)	Senior executives (employers, owners, and senior managers) at every enterprise must understand their responsibilities under Canadian law to provide a safe and healthy workplace and comply with training and other requirements. This e-course introduces the principles of Canadian law and the elements and benefits of a strong health and safety program. It emphasizes the need for due diligence by all executives to limit concerns regarding civil and criminal liability. The course was developed by the Canadian Centre for Occupational Health and Safety (CCOHS).
P0233EN	Health and Safety Awareness	This Health and Safety Awareness online training course was designed for employers, supervisors, and workers. This course outlines key health and safety rights and responsibilities of different groups in the workplace, helps you identify the types of workplace hazards, outlines protective measures that should be taken to ensure everyone in a workplace is safe and how you can participate in the health and safety of your workplace.
P3191EN	Health and Safety	This online Health and Safety Awareness for Ontario Supervisors

	Awareness for Ontario Supervisors (CCOHS)	training course explains your role and duties as a supervisor regarding health and safety at the workplace, why it is important to know what Ontario's Occupational Health and Safety Act (OHSA) and regulations require, and outlines how to recognize, assess, control and evaluate hazards to keep your workers safe.
P3059EN	Health and Safety Awareness for Ontario Workers (CCOHS)	This Health and Safety Awareness online training course explains your rights and responsibilities as a worker in Ontario, and what the province's Occupational Health and Safety Act (OHSA) requires from workers, supervisors, and employers. It is important to understand what the law says and means so that you know your roles and responsibilities, and how this knowledge helps you to stay safe at work. You also need to be aware of common hazards in the workplace, and what to watch out for.
P1197EN	Health and Safety Committees (CCOHS)	This Health and Safety Committees online training course is a practical introduction to Health and Safety Committees. This course offers guidance on how to establish a new committee, how a committee can perform its functions, and how it can be effective. It introduces the course participant to the roles and responsibilities of a committee and its members.
P1109EN	Health and Safety for Managers and Supervisors (CCOHS)	This Health and Safety for Managers and Supervisors online training course is designed to give managers and supervisors an understanding of the components of workplace health and safety. In this course, you will learn how to recognize hazards and take effective preventive actions to prevent injuries and foster a safety culture at your workplace.
P1339EN)	Health and Safety for Office	In this Health and Safety for Office Managers online training course, you will learn about hazards in the office and how to prevent them

	Managers (CCOHS)	and gain an understanding of the components of workplace health and safety. This course focuses on the manager's legal responsibilities and steps to fulfill them such as inspections, accident investigation, and accommodation of injured employees.
P0199EN	Impairment and Cannabis in the Workplace (CCOHS)	Being impaired at work - whether caused by alcohol, drugs, or another source - can affect our ability to focus, make decisions, follow instructions, and handle equipment and tools. This online Impairment and Cannabis in the Workplace training course focuses on impairment and the steps a workplace can take to address this issue, using cannabis as an example.
P0269EN	Impairment: What Workers Need to Know (CCOHS)	This Impairment: What Workers Need to Know is an online training course will help you learn about your role as a worker in recognizing and responding to workplace impairment. This course will also help you learn about your organization's policies and procedures to help make sure that everyone is treated fairly and has a safe place to work.
P1499EN	Indoor Air Quality: An Introduction (CCOHS)	The quality of the air we breathe during our work can affect our health, comfort, and productivity. This Indoor Air Quality online training course will help you understand the factors that contribute to good indoor air quality (IAQ) in offices and non-industrial workplaces. This course provides practical advice on how to investigate and respond to indoor air problems.
P1224EN	Ladder Safety (CCOHS)	This online Ladder Safety training course provides a practical introduction to working safely with ladders. This course focuses on the duties of the employee when using a ladder – inspection before use, proper set up of ladder, and how to work safely while on the ladder. Topics include: choosing the correct ladder, pre-use

		inspection, setting up the ladder, working safely on the ladder, and proper storage and maintenance.
P0517EN	Lead Safety Awareness	This Lead Safety Awareness online training course was designed for employers, managers, supervisors, and workers in construction and other industries where workers may be exposed to lead. This course explores working safely in lead-contaminated areas. This course will discuss how to work safely in lead-contaminated environments and recognize the ways in which workers are exposed to lead.
P1256EN	Lockout (CCOHS)	In this Lockout online training course, you will learn how lockout is used to control hazardous energies in the workplace. This course explains the various types of hazardous energies, such as electrical, mechanical, and pneumatic and It outlines procedures to ensure that workers will be safe when cleaning, repairing, maintaining, and installing powered equipment.
P0436EN	Machine Guarding	This Machine Guarding online training course provides an overview of the types of mechanical motions and actions that can be hazardous. This course will teach you how to assess their risks, recall the different types of machine guards and safeguarding devices and methods, and how to outline the legal requirements for safeguarding.
P0408EN	Managing a Remote Workforce	This Managing a Remote Workforce online training course explores the challenges of managing a remote workforce and outlines strategies that managers can use to keep their teams engaged and productive. In times of crisis, employees are sometimes required to work from home. The transition from the traditional workplace to a remote environment is not easy.

P1343EN	Manual Material Handling and Back Safety	This Manual Material Handling and Back Injuries online training course is designed for workers, supervisors, and managers. Manual material handling (MMH) involves the moving of material by hand through lifting, lowering, carrying, pushing, pulling, shoveling, or any combination of these actions. This course explores how the back works and discusses the causes and prevention of MMH injuries.
P2122EN	Manual Materials Handling (CCOHS)	This online Manual Materials Handling training course was designed for employers, employees, managers, and supervisors interested in health in the workplace. This course will help you to understand the various risks of manual materials handling and how to take effective measures to eliminate or control these risks in the workplace.
P0457EN	Mould Awareness	In this Mould Awareness online training course, we explain what moulds are, examine the health effects of mould exposure, review the duties of employers under current legislation, and outline methods of mould prevention and control. Mould can be a serious workplace issue and can be hazardous to our health, in this course you will learn how to keep the workplace safe from moulds.
P0431EN	Musculoskeletal Disorders (MSDs) in the Workplace	his Musculoskeletal Disorders (MSDs) in the Workplace online training course explores how painful disorders of the nerves, muscles, tendons, and joints develop over months or years. In both the US and Canada, they represent approximately 1/3 of all workplace injuries and illnesses, costing North American employers tens of billions of dollars a year in direct costs and as much as five times as much in indirect costs.
P1635EN	Musculoskeletal Disorders [MSDs]: Prevention	This MusculoSkeletal Disorders [MSDs]: Prevention online training course is designed for employers, managers, and supervisors who are responsible for ensuring the health and safety of workers. It is

	(CCOHS)	also useful for members of health and safety committees, and for employees who are participating in MSD-prevention activities. This course will help you identify and evaluate the risks of MSDs in your workplace and develop effective prevention.
PO354EN	Office Ergonomics	This Office Ergonomics online training course is designed for all employees and supervisors. Workers in many types of workplaces are vulnerable to ergonomic injuries. Learn how Work-related Musculoskeletal Disorders (WMSDs) can be reduced or eliminated. In this course, you will learn about the ergonomic hazards and risks of office work and measures to control them.
PO438EN	Office Ergonomics (CCOHS)	This Office Ergonomics online training course is designed for any employee in the workplace. This course deals specifically with problems and injuries related to the use of computers and other office equipment. The goal of this course is to give you the information to help find solutions to ergonomic issues in your workplace.
P1229EN	Office Health and Safety (CCOHS)	This Office Health and Safety online training course provides a practical introduction to office health and safety for managers, supervisors, and employees, including health and safety committee members. It describes how to develop a health and safety program and introduces potential hazards in an office environment and how to prevent them.
P1789EN	Orientation on Health and Safety for New Workers (CCOHS)	This Orientation on Health and Safety for New Workers online training course provides a general introduction to occupational health and safety for all new workers. This two-part course introduces new workers to the principles and practices of health and safety, including information about how to prevent common

		workplace hazards such as material handling, falls, and chemicals.
PO417EN	Pandemic Awareness (CCOHS)	Most of our lives are a combination of work, family, and community involvement. A pandemic can affect all these areas. Being informed and knowing what to do in the event of a pandemic can help minimize the impact This Pandemic Awareness online training course describes what a pandemic is, how an influenza virus spreads, and the impact a pandemic may have on workplaces, our communities, and us.
PO418EN	Pandemic Planning (CCOHS)	This Pandemic Planning online training course will help organizations understand the issues that need to be considered during a pandemic, and the importance of being prepared. It emphasizes steps that workplaces can take to plan employee absences, describes the elements of a business continuity plan, as well actions that may help slow the spread of the virus and keep employees healthier.
P1245EN	Personal Protective Equipment: The Basics (CCOHS)	This Personal Protective Equipment: The Basics online training course explores the basics of the common types of personal protective equipment (PPE) used to help minimize exposure to many workplace hazards. Identify what PPE can and cannot do. This course will look at common personal protective equipment PPE such as hard hats, safety glasses, safety shoes, and chemical protective clothing.
P1251EN	Preventing Falls from Slips and Trips (CCOHS)	Falls from slips and trips are common workplace occurrences that can result in serious injuries and disabilities. This online Preventing Falls from Slips and Trips course explains how same level falls common workplace incidents are and how they can cause serious injuries and disabilities. The course focuses on the two most

		common types of falls: falls at the same level and falls on stairs. Fall hazards of these types exist in most workplaces including offices, the service sector, manufacturing, and construction.
P1398EN	Preventing Hearing Loss from Workplace Noise (CCOHS)	This Preventing Hearing Loss from Workplace Noise online training course introduces noise in the workplace and explains some of the technical basics of noise it explains how noise affects hearing and how to recognize noise hazards at work. The focus of the course is hearing loss prevention and the ways to eliminate or reduce noise exposure.
P1271EN	Return To Work: The Basics (CCOHS)	This Return to Work: The Basics online training course is designed for all employees/employers. This course provides a practical overview of Return-to-Work strategies, solutions, and program implementation. This course will discuss the requirements of a return-to-work program, the roles, and responsibilities of employers, and how to ensure a successful return to work.
P4570EN	Safety in Bloodborne Pathogens	This Safety in Bloodborne Pathogens for Employees online training course will show you how exposure to bloodborne pathogens occurs so that you can help protect yourself and others. Exposure to bloodborne diseases is a serious concern for employees in many sectors of the workforce. Bloodborne pathogens are the disease-causing microorganisms found in blood, as well as in human blood components and products.
P3053EN	Sanitary Sewage Discharge Awareness (CCOHS/BC ARC)	N/A

P2411EN	Stress in the Workplace (CCOHS)	This online Stress in the Workplace training course provides an introduction to the complex issue of stress in the workplace. You will gain an understanding of what workplace stress is, its causes, and the negative impacts. Workers and managers alike will learn to identify signs of workplace stress, as well as measures to prevent, eliminate or reduce stress in the workplace.
P0193EN	TDG: An Overview (CCOHS)	This TDG: An Overview online training course provides an overview of the Transportation of Dangerous Goods (TDG) system for managers, employees, and others who need to know about TDG, but are not responsible for TDG activities. It includes information about your responsibilities for TDG, especially for the training and certification of company personnel.
P0446EN	Transportation of Dangerous Goods (CCOHS)	People who handle, offer for transport, or transport (i.e. handle, ship, carry or receive) dangerous goods must be adequately trained and hold a TDG Certificate of Training for their work. This Transportation of Dangerous Goods-TDG online training course will provide a detailed description of all aspects of the TDG system for managers and everyone with TDG responsibilities.
P3700EN	Transportation of Dangerous Goods (TDG): Overview	This Transportation of Dangerous Goods (TDG) online training course is designed for employees in the transportation and chemical industries who transport and manage dangerous goods. In order to minimize the risks associated with transporting dangerous goods, and to keep the public and the environment safe, everyone involved in the shipping of dangerous goods must learn about and follow the requirements of the Transportation of Dangerous Goods Act and the Transportation of Dangerous Goods Regulations.
P0304EN	Violence in the	Workplace violence is a serious issue that affects all business sectors

	Workplace: Awareness (CCOHS)	and occupations. It affects the safety and security of every employee and employer. This Violence in the Workplace: Awareness online training course is designed for managers, supervisors, and employees involved in the development or implementation of a workplace violence prevention policy.
P0388EN	Violence in the Workplace: Establish a Prevention Program (CCOHS)	This Violence in the Workplace: Establish a Prevention Program online training course introduces managers, supervisors, and employees to the key components of an effective workplace violence prevention program. This course will provide knowledge and tools to assess risks and to take steps to eliminate or minimize the potential for workplace violence.
P0356EN	Violence in the Workplace: Recognize the Risk and Take Action (CCOHS)	This Violence in the Workplace: Recognize the Risk and Take Action online training course helps workers, frontline supervisors, and others to develop a clear understanding of what workplace violence is, the consequences of workplace violence and preventive measures that can be taken. This course was designed for managers, supervisors, and employees involved in the development or implementation of a workplace violence prevention policy.
P4632EN	WHMIS 2015 for Office Environments (CCOHS)	In an office environment, chemicals can come in the form of cleaners, paints, flammable aerosols, and gas cylinders, which all have their own unique set of hazards. This WHMIS (Workplace Hazardous Materials Information System) for Office Environments online training course helps workers to identify these products, understand their specific hazards, and store, handle and use them safely.
P4435EN	WHMIS 2015 for Workers (CCOHS)	WHMIS labels and safety data sheets are required for all hazardous products in the workplace. Before using these products, workers

		need to be educated on WHMIS, which was amended in December 2022 to include a new physical hazard class, the adoption of a non-flammable aerosols hazard category, and new subcategories for flammable gases.
P4458EN	WHMIS for Managers and Supervisors	This online WHMIS for Managers and Supervisors training course will help managers and supervisors to understand and meet their health and safety responsibilities under WHMIS, which was amended in December 2022 to include a new physical hazard class, the adoption of a non-flammable aerosols hazard category, and new subcategories for flammable gases. This course was developed by the Canadian Centre for Occupational Health and Safety (CCOHS).
P2406EN	Working at Heights (CCOHS)	This online Working at Heights training course will teach you to assess and control hazards related to working at heights, including fall prevention and fall protection. Key topics include fall prevention techniques, emergency preparedness, and safe use of ladders, scaffolds, lifts and platforms. Protect your workers by managing the risks of working at heights.
P0410EN	Working from Home Effectively	This Working from Home Effectively online training course is designed for all remote workers and addresses the challenges and advantages of working remotely and offers tools to make it most effective. Many of us are working from home and trying to do it effectively, and this course offers tools to enhance productivity.
P2121EN	Workplace Inspections (CCOHS)	This Workplace Inspections online training course explains how to effectively prepare, conduct and document inspections, and the importance of follow-up. This course will explore the following key topics; how inspections contribute to workplace health and safety, legal requirements, establishing checklists and procedures for your

		workplace, how to conduct an inspection, and making effective recommendations.
P0462EN	Young Worker Safety Orientation	This Young Worker Safety Orientation online training course outlines what young workers need to know about health and safety legislation, the rights and responsibilities of employers, supervisors, and workers as set out in occupational health and safety legislation, the types of workplace hazards young workers may encounter, and protective measures that should be taken to ensure everyone in a workplace is safe.
